HYDRAULIC EXCAVATOR

Model Code: ZX200-5G / ZX200LC-5G / ZX210H-5G / ZX210LCH-5G
ZX210K-5G / ZX210LCK-5G

Engine Rated Power: 125 kW (168 HP)
Operating Weight:
- ZX200-5G: 19800 kg
- ZX200LC-5G: 20400 kg
- ZX210H-5G: 21100 kg
- ZX210LCH-5G: 21500 kg
- ZX210K-5G: 21100 kg
- ZX210LCK-5G: 21500 kg

Backhoe Bucket: ISO Heaped: 0.51 - 1.20 m³
A ZAXIS hallmark – industry-leading hydraulic technologies, and performance no other can beat. New ZAXIS provides reliable solutions: impressive fuel economy, swift front movements, and easy operation. You’ll also find Hitachi technological prowess and expertise, such as the optimized hydraulic system and engine. New ZAXIS features the key benefits of high quality, low fuel consumption, and high durability, all of which serve to ensure low running costs. New ZAXIS, which is empowered by comprehensive evolution, will realize customers’ visions and dreams, and pioneer your colorful future.

Key Benefits for Low Running Costs
- 9% reduction in fuel consumption
- More fuel reduction in the ECO mode
- Swift front movements with HIOS III hydraulics
- Powerful lifting operation
- Boosted swing torque
- Enhanced power digging

More Production with Less Fuel
- 9% reduction in fuel consumption
- More fuel reduction in the ECO mode
- Swift front movements with HIOS III hydraulics
- Powerful lifting operation
- Boosted swing torque
- Enhanced power digging

No Compromise on Operator Comfort
- Comfortable operating environment
- Comfort-designed operator seat
- Robust cab
- New, easy-to-use multifunctional monitor

Reliable Solutions, with Various Options
- Varied jobs, varied options
- Recommended options

Pursuits of Performance and Durability
- Prestige R&D and quality control
- Durable, reliable engine
- Rock-solid, durable front attachment
- Strengthened undercarriage
- Proven upperstructure

Simplified Maintenance
- Dust-proof indoor net
- Grouped remote inspection points
- Attractive, robust body
- Low life cycle costs

Hitachi Support Chain
- Remote fleet management with Global e-Service
- Parts and service

Various Versions
- Heavy-duty version: H-series
- Demolition version: K-series

Note: The photos in this brochure show excavators with optional equipments such as rear view camera.
More Production with Less Fuel

9% Reduction in Fuel Consumption

New ZAXIS is a fuel-thrifty excavator that can reduce fuel consumption by 9%, compared to the conventional ZX200-3/ZX200-3F family, thanks to the HIOS III hydraulic system and engine control system, thereby reducing CO₂ emissions.

More Fuel Reduction in the ECO mode

The ECO mode, a new economical mode, can further cut fuel consumption by 9% compared to the PWR mode, without sacrificing digging speed by optimal matching of operations.

Swift Front Movements with HIOS® III Hydraulics

Operating speed increases with less fuel consumption thanks to the HIOS III hydraulic system, developed by industry-leading hydraulic technologies and a wealth of experience. Actuators work quickly by boom weight, without needing a regenerative circuit and pressure oil.

Rapid Arm Roll-in

Arm roll-in speed increases by combined flow from arm and boom cylinders through regenerative valves for productive excavation.

Fast Arm Speed During Boom Lowering

Arm speed increases by boom weight during boom lowering, without needing pressure oil from a pump. That is, arm circuit flow is increased for higher arm speed, allowing for quick loading of a dump truck and positioning of the front.

Powerful Lifting Operation

The Auto Power Lift mode, which automatically surge lifting force by 10% when needed, allows for powerful lifting of buried concrete pipes or sheathing sheets.

Boosted Swing Torque

Allows for powerful wall cutting with the bucket, and smooth swing operation on slope.

Enhanced Power Boost

The Power Boost mode allows the operator to surge 10% more digging force for powerful excavation by pressing its button on the control lever.
Pursuits of Performance and Durability

Prestige R&D and Quality Control

Hitachi has earned praise for technological prowess and product performance around the world. R&D Division has a track record – including excellent design, stress analysis expertise using CAE system, and abundant production data base. What’s more, a large-scale durability test field (427 hm²) allows for a series of stringent testing of new machines. Production Division strives to automate production processes, including robotic welding, machining, paneling, assembling and transferring.

Durable, Reliable Engine

This engine has a track record showing impressive durability at countless tough job sites around the world. The engine — associated with a rugged design, a direct fuel injection system and an elaborate governor — goes green, and complies with EU Stage II and US EPA Tier 2 emissions regulations.

The cooling system well keeps the engine cool. The engine cover has a wider air suction area, and radiators are arranged in parallel for efficient cooling. This parallel arrangement also facilitates their cleaning.

The ample-capacity intercooler and turbocharger help yield a whopping 125 kW (168 HP) output for higher production in shorter job schedule.

Rock-Solid, Durable Front Attachment

The boom top and foot are reinforced with thickened high-tensile steel brackets, which incorporate steel bushings to enhance durability. Arm cylinder and boom cylinders (rod extend ends) cushion shocks at stroke ends to cut noise and extend service life.

Joint pins at the front attachment are tightly fit to reduce jolt and sound. The arm-bucket joint is protected by WC thermal spraying on its contact surfaces to reduce wear and jolt. New-type HN bushings, utilized on joint pins, retain grease inside for longer greasing intervals. A reinforced resin thrust plate, mounted on the bucket pin, helps reduce wearing noise.

Strengthened Undercarriage

The X-beam frame is made monolithically with fewer welds for higher rigidity and durability. Track adjusters absorb impacts to crawlers. Front idlers and adjuster cylinders are integrated to increase durability. Idler brackets and travel motor brackets are both thickened for added durability.

Proven Upperstructure

The upperstructure frame is reinforced with the proven D-section skirt to increase rigidity against damage by obstacles. A large door catch is added to reduce shocks and jolts of the cab and upperstructure.

Rock-Solid, Durable Front Attachment

The boom top and foot are reinforced with thickened high-tensile steel brackets, which incorporate steel bushings to enhance durability. Arm cylinder and boom cylinders (rod extend ends) cushion shocks at stroke ends to cut noise and extend service life.

Joint pins at the front attachment are tightly fit to reduce jolt and sound. The arm-bucket joint is protected by WC thermal spraying on its contact surfaces to reduce wear and jolt. Strengthened Undercarriage

The X-beam frame is made monolithically with fewer welds for higher rigidity and durability. Track adjusters absorb impacts to crawlers. Front idlers and adjuster cylinders are integrated to increase durability. Idler brackets and travel motor brackets are both thickened for added durability.

Proven Upperstructure

The upperstructure frame is reinforced with the proven D-section skirt to increase rigidity against damage by obstacles. A large door catch is added to reduce shocks and jolts of the cab and upperstructure.
New, Easy-to-Use Multifunction Monitor
The new multi-language, multifunction monitoring system comprises a 7-inch high-resolution color monitor and a multifunction controller. The monitor allows the operator to check varying operating variables: oil temperature, fuel level, work mode, full-auto air conditioner, AM/FM radio, rear view monitor camera (optional), maintenance support, and attachment flow adjustment. Menu items can be selected and adjusted by a multifunction controller on the control panel. A new rear view monitor camera always displays the view behind the machine.

No Compromise on Operator Comfort

Comfortable Operating Environment
You'll feel comfortable and confident, with plenty of leg space and excellent visibility when operating the cab. The new compact console gives more leg space. The new door pillar is shifted rearward by 70 mm to widen an entry space for easy access. A new LED room light, interlocked with the door, turns on when the door opens. The front window is easily removed and stored overhead using slide rails. The overhead window is openable for ventilation. Ample air conditioner vents are located strategically for uniform air circulation inside the cab. The control panel and control levers are arranged within easy reach of the operator. AM/FM radio and AUX port (optional) for a mobile music player are available for a long work day with less fatigue. All these designs focus on operator comfort.

Comfort-Designed Operator Seat
The luxury cloth seat is fitted with a headrest and arm rests for operator comfort. The seat can be adjusted in multiple ways, sliding and reclining, to suit operator's size and preferences. The seat can slide rearward by 40 mm more for added leg space. An air suspension with a heat pad is optional.

Robust Cab
The robust cab, meeting the OPG (Top Guard Level 1), protects the operator from falling objects. The pilot control shut-off lever is provided with a neutral engine start system that permits engine starting only when the pilot control shut-off lever is in Lock position. The engine is lockable by entering a password through the 10-key panel.
Simplified Maintenance

**Dust-Proof Indoor Net**
A dust-proof indoor net, provided at the front of radiator, can be easily removed and cleaned with compressed air. At the rear of the radiator, air blowing can be done through a one-touch open cover. The air condenser is openable for easy cleaning at its rear.

**Attractive, Robust Body**
Side frame tops of the undercarriage are sloped to let muck slide away. Track adjuster greasing ports are repositioned for easier lubrication, and well protected from muck packing.

**Grouped Remote Inspection Points**
Service points are concentrated inside left and right covers that are readily accessible from ground level for convenient servicing and inspection, including water draining from the fuel tank, replenishment of coolant, and replacement of filters. The fuel tank is anti-corrosion coated on its inside, and has a large cleaning port at the bottom. These wise designs effectively keep fuel clean, and ease servicing. Handrails are provided at convenient locations for easy riding on the upperstructure. Plenty slip-resistant plates are located for safe maintenance.

**Low Life Cycle Costs**
Service intervals are long enough to slash maintenance costs.

---

Note: Periodic inspection is required to check oil contamination and such.

- **Engine Oil**: 500 h
- **Engine Oil Filter**: 500 h
- **Hydraulic Oil**: 5,000 h
- **Hydraulic Oil Filter**: 1,000 h
- **Fuel Filter**: 500 h

---

The photo shows an excavator with an optional front glass lower guard.
Reliable Solutions, with Various Options

Easy-to-Use Attachments

The operator can change over valves, adjust extra circuit flow, and check settings from the multifunctional monitor next to the operator seat. What’s more, 11 jobs, including flow rate setting, can easily be selected by their identified names.

Easy-to-Operate Breaker

When using a breaker that requires frequent change of hydraulic oil and filters, an extra hour meter on the multifunctional monitor displays operating hours of the breaker, suggesting adequate replacement timing of oil and filters. The Breaker Alarm (optional) displays an alert mark on the monitor screen, and sounds when the breaker works continuously over one minute.

Varied Jobs, Varied Options

Lower cab front guard is provided for protection against debris during demolition and breaker operation. The hose rupture valve is added to reduce oil leaks, and prevent the attachment from lowering, especially when a grapple or cutter is used, or when a front hose is punctured. High-performance filters and in-line filters are available at tough job sites.

Recommended Options

- Breaker setting
- Breaker hour meter
- Attachment basic piping
- Additional cab roof front lights
- Rear view camera
- Electric fuel refilling pump
- Lower cab front guard
- Boom boom rupture valve
- Pre-Cleaner
- Additional cab roof front lights
Hitachi Support Chain

Hitachi Support Chain is a full customer support system offered after buying a Hitachi machine.

Remote Fleet Management with Global e-Service

Easy Access to On-Site Machines through the Internet

This on-line fleet management system allows you to access each on-site machine from a PC in your office. You can get its operating information and location to increase productivity of the fleet and reduce downtime. Operating data and log are sent to a Hitachi server for processing, and then to customer and dealers around the world. This system is available 24 hours a day, all the year around.

Main Features of Global e-Service

Functions
Global e-Service provides easy access to a machine on site, conveying operating information and log, including daily operating hours, fuel level, temperatures, pressures, and likes.

Maintenance
Maintenance data and log are displayed on an easy-to-read monitor screen, suggesting recommended maintenance for efficient fleet management.

Parts and Service

Hitachi full customer support is available everywhere on the globe for full customer satisfaction through Hitachi local dealers.

Parts

Hitachi Global Online Network, a parts supply system, is linked with Japan Parts Center, overseas depots and over 150 dealers abroad to deliver on-line parts information, including in-stock parts, order receptions, shipments and delivery period of over one million parts and components.

Genuine Hitachi Parts
Genuine Hitachi parts, meeting Hitachi stringent quality standards, are guaranteed according to Hitachi warranty standards. The use of genuine Hitachi parts, including engine, fuel, hydraulic oil and filters, may slash running costs, and extend machine life.

Ground Engaging Tools (GETs)
Hitachi provides an array of Hitachi Ground Engaging Tools developed and built for a variety of applications.

Using high-quality, well-maintained GETs will help you get customers’ trust.
Note: Some dealers do not handle Hitachi GETs.

Remanufactured Components
Hitachi components are remanufactured according to the stringent remanufacturing standards at four factories around the world. They have high quality equivalent to new ones, and backed up by Hitachi warranty system.
Note: Some dealers do not handle Hitachi Remanufactured Components.

Service

Extended Warranty — HELP
Hitachi Standard Warranty System is available on all new Hitachi machines. In addition, Hitachi offers Hitachi Extended Life Programs (HELPs) to suit customer expectations – protecting machines under tough operating conditions, avoiding unexpected downtime, and reducing repair costs.
Note: Warranty conditions vary by equipment.

Diagnostic Tools — Maintenance Pro
Electronic control system needs quick on-site solutions, apart from mechanical repairs. Hitachi’s Maintenance Pro can diagnose machine failures in a short time by plugging a PC into a failed machine.

Technical Training
On-site servicing matters despite locations to keep the machine at peak performance and reduce downtime. Technical Training Center (TTC), located in Japan, educates and trains service technicians and service support personnel coming from Hitachi dealers and factories on the globe according to the international training programs.
Various Versions

**Heavy-Duty Version: H-Series**

**ZAXIS 210H**

- **Reinforced Front Attachment (H-Boom / H-Arm)**
  - Thickened steel plates, damage prevention plates, and square bars
  - Thickened steel plates, additional lateral-type wear plates, and additional reinforcement plates at cutting edges

- **Reinforced lower flange**
- **0.80 m³ H-bucket**
- **Reinforced link B**
- **Reinforced idler bracket**
- **600 mm reinforced triple grouser shoes**
- **Reinforced side step (bolted)**
- **Reinforced track guards (2 on each side)**
- **Reinforced lower flange**
- **Mechanical suspension seat**
- **Lower cab front guard**
- **400 kg heavier counterweight**

**Notes:** Reinforced portions not available on standard ZAXIS 200 are shown.

**Demolition Version: K-Series**

**ZAXIS 210K**

- **Reinforced Front Attachment (K-Boom / K-Arm)**
  - Thickened steel plates, and damage prevention plates
- **Reinforced link B for demolition**
- **Reinforced idler bracket (2 on each side)**
- **Reinforced lower flange**
- **6.0 mm reinforced undercover**
- **Reinforced side step (bolted)**
- **6.0 mm reinforced undercover**
- **0.80 m³ reinforced bucket**
- **9 mm reinforced track undercover**
- **600 mm reinforced triple grouser shoes**

**Notes:** Reinforced portions not available on standard ZAXIS 200 are shown.

**K-cab**
- **(Cab with overhead window & guard)**
- **Lower cab front guard**
- **400 kg heavier counterweight**
- **Mechanical suspension seat**
- **Twin wipers**

**Breaker and crusher piping**
- **High-performance full-flow filters with restriction indicators**
- **Attachment basic piping**

**Notes:** Photo shown model equipped with optional accessories for breaker and crusher. For more details, contact your dealer.

*Photo above shows machine images at work, which include machines other than ZAXIS 200 series.*
### SPECIFICATIONS

#### ENGINE
- **Model**: Isuzu CC-6BG1T
- **Type**: 4-cycle water-cooled, direct injection
- **Aspiration**: Turbocharged, intercooled
- **No. of cylinders**: 6
- **Rated power**: ISO 3049, net: 125 kW (168 HP) at 2 100 min⁻¹ (rpm)
- **Maximum torque**: 367 N\(\cdot\)m (56 kgf\(\cdot\)m) at 1 800 min⁻¹ (rpm)
- **Piston displacement**: 6.494 L
- **Bore and stroke**: 105 mm x 125 mm
- **Batteries**: 2 x 12 V / 88 Ah

#### HYDRAULIC SYSTEM
- **Main pumps**: 2 variable displacement axial piston pumps
- **Maximum oil flow**: 32 L/min
- **Piston pump**: 1 gear pump
- **Maximum oil flow**: 33.6 L/min

#### Hydraulic Motors
- **Travel**: 2 variable displacement swash plate piston motors
- **Swing**: 1 swash plate piston motor

#### Relief Valve Settings
- **Implant circuit**: 34.3 MPa (500 kgf/cm²)
- **Swing circuit**: 34.3 MPa (500 kgf/cm²)
- **Travel circuit**: 34.3 MPa (500 kgf/cm²)
- **Pilot circuit**: 3.9 MPa (50 kgf/cm²)
- **Power boost**: 38.0 MPa (550 kgf/cm²)

#### UNDERCARRIAGE
- **Tracks**: Heat treated connecting pins with dirt seals. Hydraulic (grease) track adjusts with shock-absorbing recoil springs.
- **Numbers of Rollers and Shoes on Each Side**
  - **Upper rollers**: 2
  - **Lower rollers**: 7: ZX200-5G/ZX210H-5G/ZX210K-5G
  - **Lower rollers**: 8: ZX200LC-5G/ZX210LCH-5G/ZX210LCK-5G
  - **Track shoes**: 46: ZX200-5G/ZX210H-5G/ZX210K-5G
  - **Track guard**: 1: ZX200-5G/ZX200LC-5G/ZX210K-5G/ZX210LCK-5G
  - **Track guard**: 2: ZX210H-5G/ZX210LCH-5G
- **Travel Device**: Each track driven by 2-speed axial piston motor. Parked brake is spring-set/hydraulic-released disc type. Automatic transmission system: High-Low.
- **Maximum traction force**: 203 kN (20 700 kgf)
- **Gradingability**: 70% (35 degrees) continuous

#### SERVICE聯絡 CAPACITIES
- **Fuel tank**: 400.0 L
- **Engine coolant**: 23.0 L
- **Engine oil**: 25.0 L
- **Swing device**: 6.2 L
- **Hydraulic system**: 240.0 L
- **Hydraulic oil tank**: 135.0 L

#### UNDERCARRIAGE
- **Boom**: 2.42 m
- **Arm**: 2.91 m
- **Bucket**: 2.91 m

#### UPPERSTRUCTURE
- Revolving Frame: D-section frame skirt for resistance to deformation.
- **Swing Device**: Swash plate piston motor with planetary reduction gear is bathed in oil. Swing circle is single-row. Swing parking brake is spring-set/hydraulic-released disc type.
- **Swing speed**: 13.5 min⁻¹ (rpm)
- **Swing torque**: 68 kN\(\cdot\)m (5 600 kgf\(\cdot\)m)
- **Operator’s Cab**: Independent spacious cab, 1 005 mm wide by 1 675 mm high, conforming to ISO Standards.

*International Standardization for Organization*

### Notes:
1. Lifting capacities are based on ISO 13567.
2. Lifting capacity does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
3. The load point is the center-line of the bucket pivot mounting pin on the arm.
4. Indicates load limited by hydraulic capacity.
5. 0 m: Ground.

For lifting capacities, subtract bucket and quick hitch weight from lifting capacities without bucket.
## EQUIPMENT

### ENGINE
- Air cleaner double filters
- Auto idle system
- Cartridge type engine oil filter
- Cartridge type fuel pre-filter
- Cartridge type fuel main filter
- Dry type air filter with evacuator valve (with air filter restriction indicator)
- ECDPMR mode control
- Engine warm up device
- Fan guard
- Water separator
- Pre-cleaner
- Dust-proof indoor net
- Radiator reserve tank
- SO-A alternator

### HYDRAULIC SYSTEM
- Auto power lift
- Control valve with main relief valve
- Full flow filter
- High flow low pressure filter with restriction indicator
- Hose rupture valve
- Fuel filter
- Power loader
- Suction filter
- One extra port for control valve
- Work mode selector

### CAB
- All-weather sound suppressed steel cab
- AUX FM radio with 2 speaker
- Ash tray
- Auto control air conditioner
- AUX terminal and storage
- Cab (center pillar reinforced structure)
- Drink holder
- Drink holder with hot & cold
- Electric double horn
- Engine shut-off lever
- Evacuation hammer
- Fire extinguisher bracket
- Floor mat
- Footrest
- Front window washer
- Front windows on upper, lower and left side can be opened
- Lower cab front guard
- Upper cab front guard
- Glove compartment
- Hot & cool box
- Intermittent windshield wipers
- Key cylinderight
- Rear view mirror (right & left side)
- LED room light with door courtesy
- UPG top guard (ISO10262) compliant cab
- Pilot control shut-off lever
- Rear view camera
- Rear view mirror (right & left side)
- Retractable seat shut-off lever
- Tool box
- Undercover
- Utility space
- 0.2 mm reinforced undercover
- 4,200 kg counterweight
- 4,090 kg counterweight
- 2 x 88 Ah batteries

### MONITOR SYSTEM
- Alarm buzzer: overload, engine oil pressure, overheated
- Alarm: overload, engine warning, engine oil pressure, alternator, minimum fuel level, hydraulic filter restriction, air filter restriction, work mode, overload, etc.
- Displays of meters: water temperature, hour, fuel rate, etc
- Other displays: work mode, auto-idle, glow, rearview monitor, operating conditions, etc
- 32 languages selection

### LIGHTS
- Additional cab roof front lights
- Additional boom light with cover
- 2 working lights

### UPPER STRUCTURE
- Electro-hydraulic driving pump
- Fuel level float
- Hydraulic oil level gauge
- Rear view camera
- Rear view mirror (right & left side)
- Threading brake
- Tool box
- Undercover
- Utility space
- 0.2 mm reinforced undercover
- 4,200 kg counterweight
- 4,090 kg counterweight
- 2 x 88 Ah batteries

### UNDERCARRIAGE
- Built-on sprocket
- Reinforced track links with pin
- Reinforced tower flange
- Reinforced idler bracket
- Tread motor covers
- Tread parking brake
- 2 x 88 Ah reinforced track undercover
- Track guard (each side)
- Hydraulic track adjuster
- Upper and lower rollers
- 1 track guard
- 4 tie down hooks
- 400 mm triple grouser shoes
- Reinforced side step

### FRONT ATTACHMENTS
- Centralised lubrication system
- Dirt seal on all bucket pins
- Flanged pin
- FN beaming
- Reinforced main thrust plate
- Reinforced link (SS)
- WC (Tungsten-carbide) thermal spray
- 0.80 m bucket (ISO heaped)
- 0.91 m arm
- 1.68 m boom
- 4 boom
- 3 boom

### ATTACHMENTS
- Attachment basic piping
- Breaker and crusher pipe
- High mesh full flow filter with restriction indicator
- Parts for breaker and crusher
- Welded bucket link (A) with welded hook
- 2 pump combined flow for attachment basic piping
- Line filter

### MISCELLANEOUS
- Lockable fuel refilling cap
- Lockable machine covers
- Onboard information controller
- Skid resistant treads, plates and handrails
- Standard tool kit
- Tread direction mark on track frame
- Global e-Service

Standard and optional equipment may vary by country, so please consult your Hitachi dealer for details.
Built on the foundation of superb technological capabilities, Hitachi Construction Machinery is committed to providing leading-edge solutions and services to contribute as a reliable partner to the business of customers worldwide.

Hitachi Environmental Vision 2025

The Hitachi Group released the Environmental Vision 2025 to curb annual carbon dioxide emissions. The Group is committed to global production while reducing environmental impact in life cycles of all products, and realizing a sustainable society by tackling three goals — prevention of global warming, conservation of resources, and preservation of ecosystem.

Reducing Environmental Impact by New ZAXIS

Hitachi makes a green way to cut carbon emissions for global warming prevention according to LCA*. New ZAXIS utilizes lots of technological advances, including the new ECO mode, and Isochronous Control. Hitachi has long been committed to recycling of components, such as aluminum parts in radiators and oil cooler. Resin parts are marked for recycling.

*Life Cycle Assessment – ISO 14040

Before using a machine with a satellite communication system, please make sure that the satellite communication system complies with local regulations, safety standards and legal requirements. If not so, please make modifications accordingly.

These specifications are subject to change without notice. Illustrations and photos show the standard models, and may or may not include optional equipment, accessories, and all standard equipment with some differences in color and features. Before use, read and understand the Operator’s Manual for proper operation.
